about

A career change into Software Engineering allows me to contribute to society in a meaningful way with agency over my career path. As a Software Engineer I want to use my skills to build projects that are inclusive and accessible to all. My former career as an actor has allowed me to cultivate skills that make me a thoughtful and empathetic team member with strong communication skills.

projects

tic-tac-toe

JavaScript, HTML and CSS.

[Play here](#)

cannedTunr

react, Express, NodeJs, Material UI

A group project using Spotify's API to build a website that allowed users to get recommendations and search for new music outside of the Spotify App.

[GitHub here](#)

Community Centre

javascript, React, Firebase, Cloud Firestore and bootstrap

A website for a community centre that allows users to book into a class and admin to edit and update classes.

experience

General Assembly - Software Engineering Immersive | 2022

- + 12 week immersive course. Full stack software development. 480 hrs.
- + Reading and implementing documentation from a range of sources

North Sydney Community Centre - Admin Assistant | 2021

- + Using Data systems to support business continuity and quick and effective service delivery
- + Creating a welcoming atmosphere for clients and stakeholders, using my warm personality and user centric values to understand the needs of guests and address them as efficiently as possible

Acting - Short Film, Television, Commercial and Theatre

- + Deconstructing a range of texts, memorising scripts in limited time frames
- + Time management
- + Working in a team and understanding how different roles contribute to a whole project
